EROELECTRONIC

JUST WHAT YOU NEED

JUST WHAT YOU NEED

ERO ELECTRONIC has existed for over 30 years, establishing itself as a producer of application engineered industrial instrumentation.

Our basic core principals have always applied. We strive to combine quality, reliability, manufacturing responsiveness and value for money in the products and control solutions we supply.

We do this by focussing on specific application markets, intelligently combining features not usually found in a single discrete instrument.

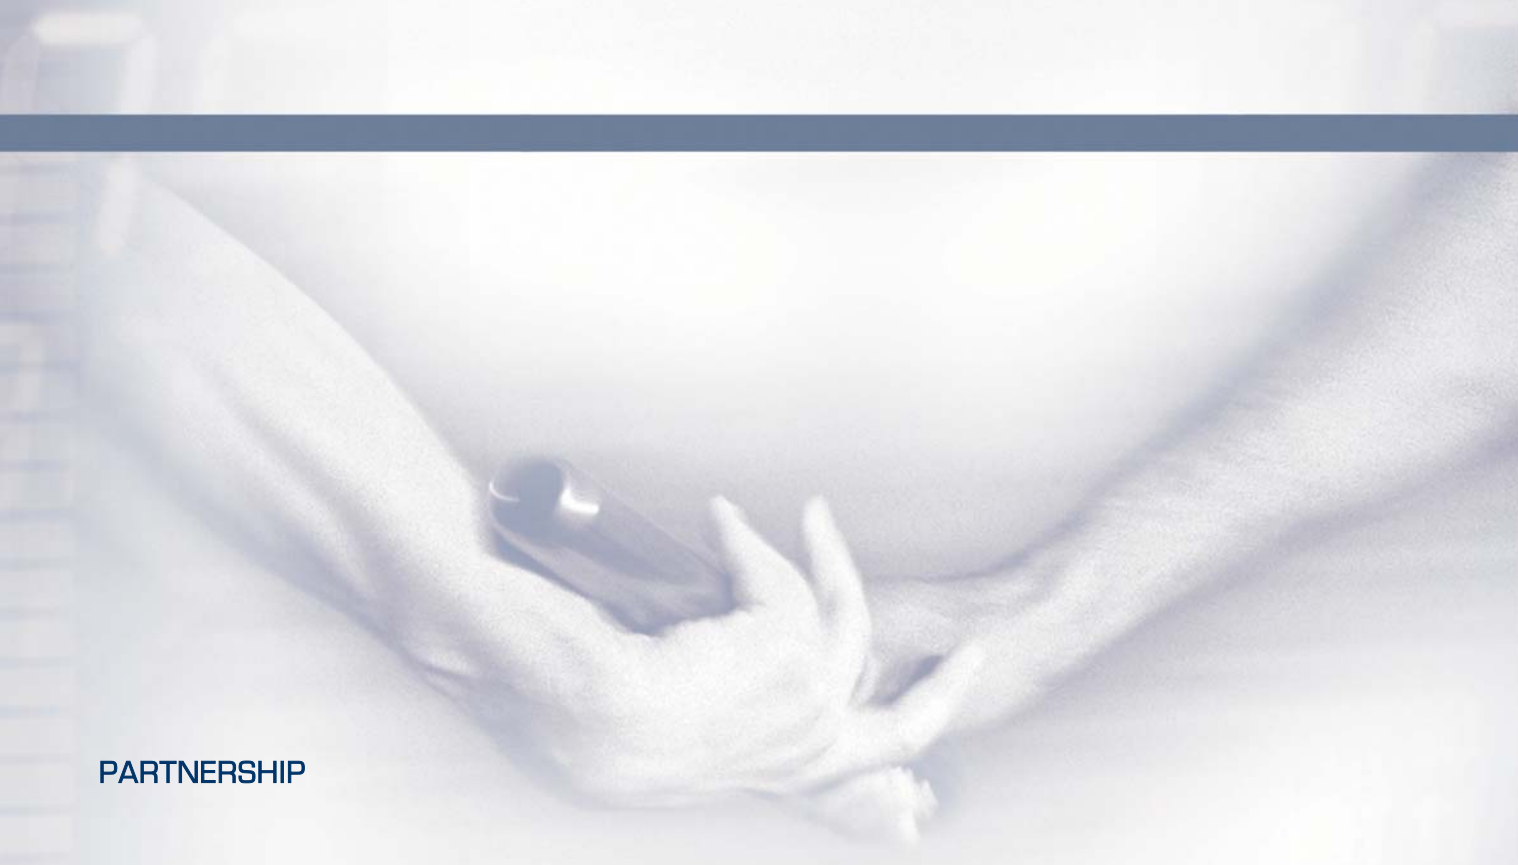
The secret to this success lies in the partnership we forge with our customers. Taking time to listen, understand and interpret their real needs, thereby providing a solution that is both business and application focused - just what you need.

FLEXIBILITY

We have reshaped all aspects of our business to keep pace with your needs, from standard catalog products to customisable control solutions. Our goal is to provide you with just what you need.

The materials and manufacturing methods we employ are selected to provide the best combination of industrial strength and flexibility.
A good example of this approach are the wipe-down fascias of our panel mounted instruments. These offer a multitude of possibilities for design customisation, while providing the ideal solution for food and laboratory applications - both demanding environments requiring a solution that is easily cleanable, hygienic and moisture tight. Durable and functional design practically are also key features of our range of customisable control solutions which offer additional design flexibility for integrated OEM control applications.

Dependable, functionality engineered and quality tested by a team of industrial instrumentation specialists. ERO Electronic is the instrumentation solution supplier of choice for many industrial instrumentation market leaders.



PARTNERSHIP

We understand the value of responsive delivery performance. Our customer driven, JIT (Just in time) manufacturing processes provide you with standard delivery lead-times of 5 days or less. Allowing you to reduce your inventory cost and stock levels while improving delivery to your customers.

Quality is core to everything we do. ERO Electronics integrated development and manufacturing processes ensure product reliability performance is consistently among the best in our industry.

Our sales and technical team work with you to develop the features you require, either as modifications to our standard catalog controller range or as a customisable control solution matched your exact requirements.

Our goal is to provide you with a control solution that guarantees value and competitive advantage to your business.

GENERAL CATALOG

COMPREHENSIVE INDUSTRIAL TEMPERATURE AND PROCESS CONTROL RANGE

APPLICATION FOCUSSED FUNCTIONALITY

HIGHLY RELIABLE DURABLE DESIGN

BACKED BY A TEAM OF TECHNICAL EXPERTS

CUSTOMISED PRODUCTS

RELIABLE SOLUTIONS TAILORED TO SUIT YOUR NEEDS

CUSTOMISABLE **OFF THE SHELF** BUILDING BLOCK HARDWARE

CUSTOMER DRIVEN MANUFACTURING

SPECIAL FUNCTION PRIVATE LABEL

FRONT PANEL STYLING AND PACKAGED TO MATCH YOUR REQUIREMENTS

OEM BUSINESS FLEXIBILITY

STANDARD INSTRUMENT FUNCTIONALITY ADAPTED TO SUIT YOUR APPLICATION
