

TFS-THS: Notice of obsolescence

Summary

Following a review of our controller ranges we have decided to move the THS and TFS controllers into Level 2 Obsolescence (special order only) with immediate effect.

Why Obsolete the THS and TFS?

The TKS family has been proposed as an improvement and an effective alternative to the TFS family for a while. It is now time to complete the transition from TFS to TKS.

We will take last buy orders for THS and TFS and subassemblies for service maintenance stocking purposes until 30 June 2010.

Latest deliveries date available: 30th September 2010.

Schedule

Nominally from July 1st 2010 the THS and TFS will be moved into Level 3 – No longer available - however this will be reviewed as required depending on business requirements.

Service Policy

ERO Electronics always strive to offer quality support and service to our customers. To this purpose a specific document illustrating the advantages and the details of the replacement with TKS is made available with the new pricelist effective April 2010 and also downloadable from our web site www.eroelectronic.com.
